

The Internet Friend or Foe?

The Internet can be a real friend because it can help you:

- Run your business 24 hours a day, 7 days a week
- Speed up communications
- Work anytime, anyplace
- Increase sales through ecommerce
- Reduce the costs of transactions through web based systems

The Internet also presents a threat due to security problems caused by: viruses, spam, adware, malicious web sites, hackers, porn, damaging emails from staff, on-line shopping at work etc.

Used well the Internet can be a powerful business tool. Used badly it can cause your business a lot of damage.

No one expert can help you with all these issues but KUB can be your guide through the jungle and help you identify and work with the right expertise.

If you would like help in getting the Internet to be a useful business tool then call Peter Dickinson on 0845 053 7417 for a meeting at no cost or obligation.
